Compact Folding Doors

The primary intention of a Sectional Door is protection of the premises against unauthorized access and weather conditions. Furthermore, the daily activities and flow of goods have to be disrupted as little as Possible. Our compact folding door is up to these tasks. In addition to optimum insulation and good sealing the door provides an excellent functionality and reliability. With its quality finish the Compact door really give your business premises a professional look. The basic door is constructed from insulated sandwich panels. These panels consists of a CFC-Free polystyrene filling that is glued with aluminum stucco cladding. The application of aluminum U-profiles at the top and bottom provide extra stability.

Commercial Doors (Special Custom)

Paramount commercial sectional overhead doors offer an attractive solution for commercial applications where visual access, light infiltration and aesthetics are key design considerations. Offered with a variety of style with glazing materials, track styles and finish options. Ideal for service stations, fire stations, professional facilities and retail environments, our sectional aluminum doors Are practical, durable and handsomely styled – and engineered for long life, low maintenance and enduring beauty.

Sectional Overhead Doors

Residential Doors

A wide selection of Overhead Doors, Sectional steel and insulated steel doors are available to satisfy applications where durability, reliability and economy are top priorities. An array of door panel profiles,

Track and hardware, and specialized options allows you to further customize these doors to your specific project requirements. Top quality materials, excellent field service and optional maintenance Program contributes to extend the door life, low maintenance costs and maximum productivity.

Residential Luxury Doors.

An inspiration in both form and function, Paramount Style View offers architectural flexibility, maximum Visibility and extreme durability in maintenance-free aluminum doors. From modern styles to classic Façade, Style View is the choice for achieving a contemporary look or accentuating the design of any Residence.

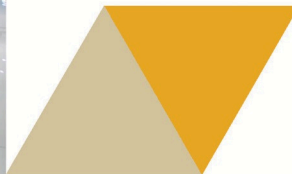

Commercial Doors

Locally manufactured, Micro-perforated, slat profile, security-rolling shutters are ideal where a high Degree of security is required while still maintaining vision. These shutters are used mainly in Shopping Malls, Showrooms, Bank etc. These shutters give virtually the same protection and security as a solid Closed type shutter but with vision. When shop/-showrooms or window displays are illuminated with Shutter in close position an amazing degree of vision is permitted.

Polycarbonate Doors

Polycarbonate Rolling shutters Description: Our Polycarbonate rolling Shutters are of a special design With reinforced steel or aluminum rods between the panels. The design and materials make our poly-carbonate shutters extremely strong and resistant to shutters for displaying valuables behind the combination of high visibility with exceptional strength make our polycarbonate shutters ideal for shops That want to keep valuable goods on display, such as jewelers, shops & showrooms. Also these shutters are good choice for premises that require a higher level of security, for examples banks.

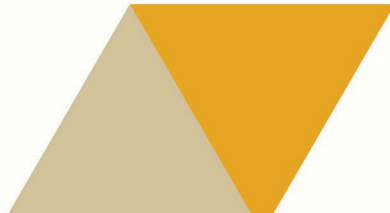

PARAMOUNT^{DOORS}

Sliding sectional Doors

The door for special fitting situations and requirements the side sliding sectional door offers many advantages. A lot of space under the garage ceiling because the door opens to the side. You can use the entire ceiling of the garage. For example, to store surfboards or canoes. Thanks to its unique design, the side sliding sectional door can also be used in difficult fitting situations with sloped roofs.

Can come with option of access to the garage the so-called wicket door function is standard in the new side sliding sectional doors. This means that both manual and power-driven doors can be opened just slightly, in order to get into the garage fast. This is practical and reduces waiting time. The 42mm thick, PU-foamed sandwich panels are characterized by excellent acoustic and thermal insulation, in addition to good door leaf stability and quiet operation.

Window shutter

Paramount window shutters retract completely into the housing just above window and roll up out of site. Partial deployment of the rolling hurricane shutter make them excellent for heat and light control. Lowering the shutter half-way reduces glare, reduces furniture-fading UV Light entering your home, and reduces radiant heat transfer, resulting in less demand on your AC unit and some customers report up to a 25% reduction in summer electric bills Motorized rolling hurricane shutters can be deployed in seconds with push-button operation and can Even be operated by hand remote.

Pergola

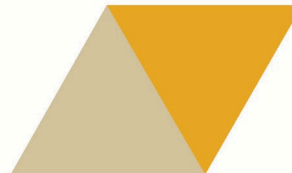

When it comes to your outdoor living area you want a roof system that is stylish but also trust worthy. Well, look no further manufactured entirely in the US, the Arcadia system is not only engineered to withstand high winds but it also comes in a variety of colors, materials and finishes. Using aluminum and stainless steel components, this low maintenance product lasts long and looks beautiful. No matter what sort of unit you are looking for, free standing or attached to an existing structure, the Paramount system is sure to enhance any area and compliment any architectural style to give you the perfect sun weather control.

Shades

Custom shades structures are custom designed for individual projects with a wide range of applications.

We provide designing, manufacturing, engineering and installation of all quality controlled structures to meet the highest expectation of our clients.

Folding Doors (Frame & Frameless)

Paramount aluminum fold doors lead the way in innovation and design. Setting the standards for other companies to follow. Rather than emphasizing on only one or two elements that make the Paramount Doors stand out. There are countless features that make the SF55 and SF75 head and shoulders above the rest. German design and manufacture.

Lim sight lines, contemporary, square edged profiles throughout and color matches furniture in line with the frame me Paramount doors the best looking on the market. Choose between our award winning SF55 and SF75 – the only German made system with a BSI Kite mark certificate – the perfect combination.

Aluminum is an ideal material as it is light, strong and stable with slim profile sections to minimize the visible frame work and maximize the glass area. Gain reassurance in the most exposed locations with this virtually maintenance free material.

Swimming pool rolling shutter

Covers optimum protection and safety, the pool shutter standard is an automatic pool cover with motor drive ,switchable by means of key switch or radio remote control .for swimming pool its safe & economical.

Designed to close automatically in the event of a fire or alarmed event. Our fire rated doors are available for service door and counter applications in commercial, industrial, institutional and retail projects.

PARAMOUNT^{DOORS}

POVIT DOORS.

Pivot doors can take any type of measurement, but with the proper pivot hinges and pivot machine. These doors can also become very heavy without any issues. This means you have the design freedom to design your dream door without worrying about the execution.

With a regular hinged door, all the door's weight is 'hanging' from the door frame. Thanks to its simple, a pivot door can easily carry much larger weights which it disposes of through the floor. With the right hinge, your pivot door can weigh up to 1100 lbs.

When applying the correct type of pivot hinge, the hinges are invisible on the finished door, contrary to the hinges of a regular hinged door. This means there are no distractions, and the focus remains on the door's design.

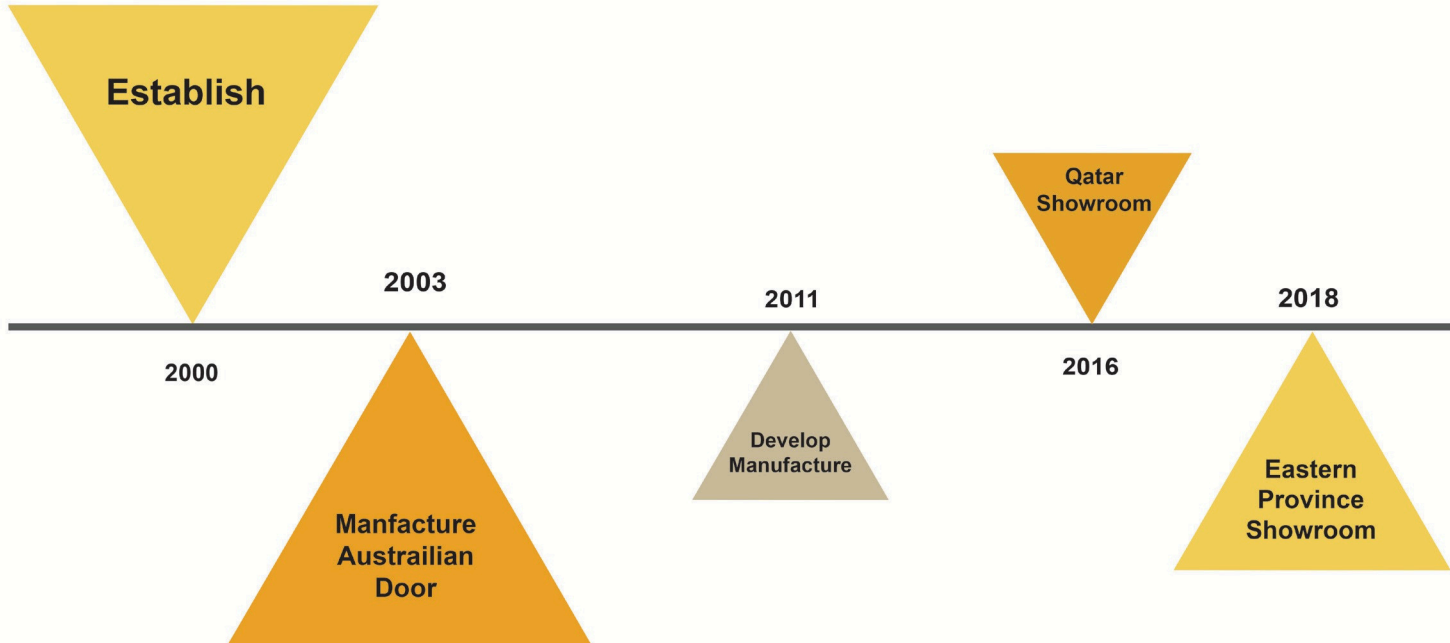

NEW

A pivot door is visually very different from a regular hinged door. When the hinge is placed 4" from the side of the door, these 4" create the pivot door's 'tail.' This tail will swing inward for an outward swinging door and outward for an inward swinging door. This allows for beautiful, elegant door movement.
